

I had heard so much about media consolidation a few years ago. I did not understand the impact until Sinclair mandated it's stations to show an anti Kerry film. I feel like I am living in a communist government, but instead of the government feeding me it's propoganda, it is Sinclair. Of course Sinclair wants to support Bush, he gave them their ability to suck up every station they could. These are public airways and should not be used to further the political goals of any corporation.

The FCC needs to put a stop to this misuse of public airways!!!!
